

Kennedys Coaches Press Release

Kennedy Coaches first in Kerry to offer In Vehicle Wi-Fi!

DATED: November 09

Passengers using Kennedys Coaches popular routes between Kerry and Cork, Galway and Limerick will now be able to check their e-mails, or access the Internet, whilst on the move!

All of their Coaches used regularly on the route have been fitted with Wi-Fi equipment by Ireland's leading passenger internet provider Fleetconnect.

Patrick Kennedy Director at the Kennedys Coaches said, "In keeping with our modern bus operation, we wish to continue to add to the services that we offer our passengers. This installation of Wi-Fi accessibility on our Coaches will enable regular passengers, students, or anyone else from our growing number of local bus passengers, to check their e-mails before they get to their destination, or to surf the internet during their journey.

Patrick Kennedy added, "The passenger growth on our network shows no sign of Peaking." Being the first Coach operator in Kerry to offer free WIFI, our passengers can see our continued commitment to invest in giving everyone across our Routes who uses our buses the best quality travel."

Fleetconnect's system was highly recommended to us from other coach operators around the country and it comes with vehicle tracking as standard and that will help us operate our fleet more efficiently, added Kennedy

Commuter routes are ideal for in-vehicle Wi-Fi services," said Patrick Cotter, Managing Director FleetConnect. "With an increasing number of hand-held devices such as mobile phones and PDAs having Wi-Fi built-in, accessing the Internet to check your email, surf the web or update your blog is now easier than ever before. With free Wi-Fi access on the bus, passengers can now make the most of their journey time to and from the office/College – at no cost to them. This really does represent another step towards the future of public transportation."

Editors Note

Kennedys Coaches

With over 50 years' hands on experience, Kennedy's have a proven record in providing a reliable, friendly & professional service.
